About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbibed in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4 year courses are B.E (Electrical and Electronics Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electrical and Electronic Engineering strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi-tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to Electrical Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi – disciplinary characters

Course Highlights

- Brief Introduction to History and Architecture of EV
- Electric Vehicle Power train
- Electric propulsion units for EV/ HEV
- Power Converters for Electric Vehicle Applications
- Sizing of drive system of EV
- Optimal control of EV /HEV
- Energy Management Strategies
- Simulation of EV in MATLAB/ ADVISOR software

Insights of the programme

Introduction to Electric Vehicles Architecture and Technologies. Storage Technologies and Energy Management used in Electric Vehicles. Application of Power Electronics and Control Systems in EVs. Modelling and simulation of Electric Vehicle and Hybrid Vehicles in MATLAB/Simulink Environment. Scheduling of EV charging and Safety of EVs. Impact of Electric Vehicles on Grid Quality Future Technology in EV.

Objectives of the programme

Transport is a fundamental requirement of modern life, but the traditional combustion engine is quickly becoming outdated. Petrol or diesel vehicles are highly polluting and are being quickly replaced by fully electric vehicles. Fully electric vehicles (EV) have zero tailpipe emissions and are much better for the environment. The electric vehicle revolution is here, and you can be part of it. Will your next vehicle be an electric one.

Explore the recent trends and challenges in the area of Electrical Vehicles. Analyze the use of different power electronic converters, Inverters and motors in electric vehicles. Understand the use of different battery systems used for electric vehicles and the appropriate technologies and controls in EVs. To develop and promote research interest in applying different techniques to solve critical problems in EV.

Description/Conclusion:

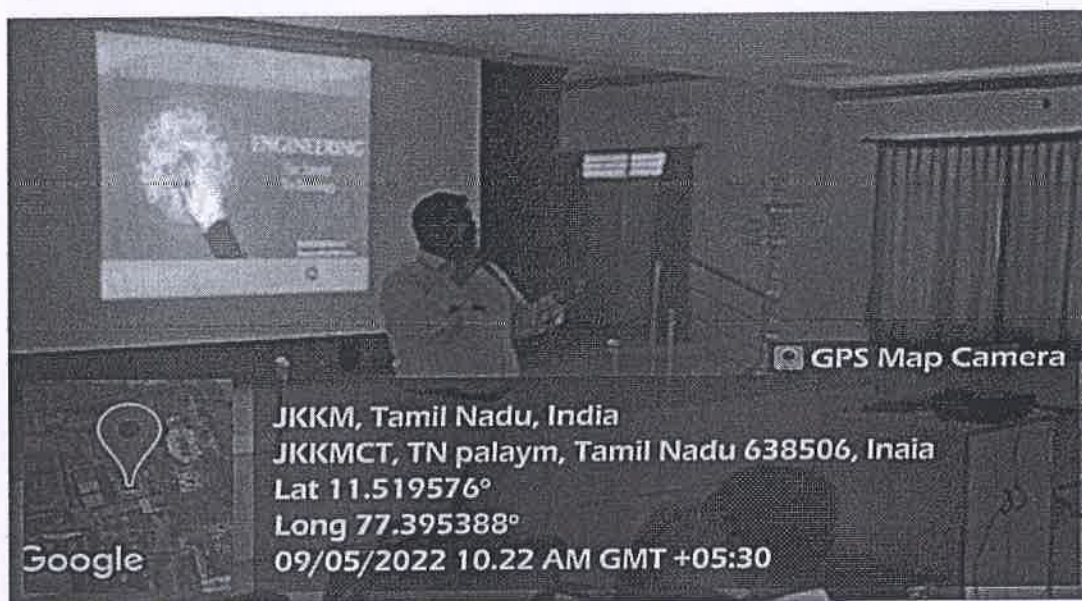

The running cost of an electric vehicle is much lower than an equivalent petrol or diesel vehicle. Electric vehicles use electricity to charge their batteries instead of using fossil fuels like petrol or diesel. Electric vehicles are more efficient, and that combined with the electricity cost means that charging an electric vehicle is cheaper than filling petrol or diesel for your travel requirements. Using renewable energy sources can make the use of electric vehicles more eco-friendly. The electricity cost can be reduced further if charging is done with the help of renewable energy sources installed at home, such as solar panels.

ABOUT THE COLLEGE

J.K.K. Munirajah is a reputed industrialist, technocrat, an educationalist, and excellence in a void social worker, a person imbued in deep spiritual values and a Philanthropist. J.K.K. Munirajah founded a Charitable Trust by name Annai J.K.K. Sampoorani Ammal Trust, Komarapalayam-638 183, Namakkal Dt., and Tamilnadu in the year of 1971. J.K.K. Munirajah established many temples of leaving to perpetuate the ever lasting memory of his beloved mother. At present Annai J.K.K. Sampoorani Ammal Charitable Trust maintains and runs Paramedical Institutions offering Diploma, Graduate and Post Graduate courses in Pharmacy, Nursing, Physiotherapy and Occupational Therapy at Komarapalayam, Namakkal Dt and a Polytechnic, Community Polytechnic and a Industrial Training Center at T.N.Palayam, Erode Dt. These educational Institutions are temples of Learning and have contributed much to a formidable social change in our society. The Trust has won many National and State awards. They are renowned educational institutions spared nothing to promote knowledge, wisdom and service-orientation.

ABOUT THE DEPARTMENT

The Automobile Engineering Department was started in the year 2010. The department offers four years B. E -Automobile Engineering. The department has a team of highly qualified, dedicated and motivated faculty

and well equipped laboratories with facilities for UG. B.E has been accredited by AICTE, New Delhi. The goal of the Automobile engineering curriculum is to create a flexible undergraduate educational experience in design, mathematics, modeling, computing, management, and engineering science. Principal study topics include fluid mechanics, thermodynamics & heat transfer, solid mechanics, materials engineering, manufacturing, energy systems, dynamics & computer Aided Design (CAD) and others.

ABOUT THE PROGRAMME

Studying entrepreneurship benefits students and Warmers from different social and economic backgrounds because it teaches people to cultivate unique skills and think outside the box. Moreover, it creates opportunity, instills confidence, ensures social Justice and stimulates the economy. The workshop will have an ideal foundation for budding Engineers the self-management will enable individuals to develop the needed disciplines that help bridge the gaps between goals and accomplishment. High achievers are people who have learned to effectively manage themselves, tapping into resources available to motivate themselves toward the fulfillment of their fullest potential. The Sessions will be handled by expert.

Description/Conclusion:

A fuel cell is an electrochemical cell that converts the chemical energy of a fuel (often hydrogen) and an oxidizing agent (often oxygen) into electricity through a pair of redox reactions. Fuel cells are different from most batteries in requiring a continuous source of fuel and oxygen (usually from air) to sustain the chemical reaction, whereas in a battery the chemical energy usually comes from substances that are already present in the battery. Fuel cells can produce electricity continuously for as long as fuel and oxygen are supplied. There are many types of fuel cells, but they all consist of an anode, a cathode, and an electrolyte that allows ions, often positively charged hydrogen ions (protons), to move between the two sides of the fuel cell. At the anode, a catalyst causes the fuel to undergo oxidation reactions that generate ions (often positively charged hydrogen ions) and electrons.

PRINCIPAL

JKK MUNIRAJAH COLLEGE
OF TECHNOLOGY

T.N. PALAYAM (Po)-638 506.

The ions move from the anode to the cathode through the electrolyte. At the same time, electrons flow from the anode to the cathode through an external circuit, producing direct current electricity. At the cathode, another catalyst causes ions, electrons, and oxygen to react, forming water and possibly other products.

ABOUT THE COLLEGE

J.K.K. Munirajah is a reputed industrialist, technocrat, an educationalist, and excellence in a void social worker, a person imbued in deep spiritual values and a Philanthropist. J.K.K.Munirajah founded a Charitable Trust by name Annai J. K.K. Sampoorani Ammal Trust, Komarapalayam-638 183, Namakkal Dt., and Tamilnadu in the year of 1971. J.K.K.Munirajah established many temples of leaving to perpetuate the ever lasting memory of his beloved mother. At present Annai J.K.K. Sampoorani Ammal Charitable Trust maintains and runs Paramedical Institutions offering Diploma, Graduate and Post Graduate courses in Pharmacy, Nursing, Physiotherapy and Occupational Therapy at Komarapalayam, Namakkal Dt and a Polytechnic, Community Polytechnic and a Industrial Training Center at T.N.Palayam, Erode Dt. These educational Institutions are temples of Learning and have contributed much to a formidable social change in our society. The Trust has won many National and State awards. They are renowned educational institutions spared nothing to promote knowledge, wisdom and service-orientation.

ABOUT THE DEPARTMENT

The Mechanical Engineering Department was started in the year 2010. The department offers four years B. E -Mechanical Engineering. The department has a team of highly qualified, dedicated and motivated faculty

and well equipped laboratories with facilities for UG. B.E has been accredited by AICTE, New Delhi. The goal of the Mechanical engineering curriculum is to create a flexible undergraduate educational experience in design, mathematics, modeling, computing, management, and engineering science. Principal study topics include fluid mechanics, thermodynamics & heat transfer, solid mechanics, materials engineering, manufacturing, energy systems, dynamics & computer Aided Design (CAD) and others.

ABOUT THE PROGRAMME

Studying the energy sector has accelerated technical progress in thermal power plants technology. One of the most important objectives in the development of thermal power plants is to optimize the plant heat rate. The power producers recognize that the low-cost, low-emissions and most efficient thermal power plants are becoming workhorses in the power generation industry. The primary objective of this FDP is to review the factors effecting thermal power plant heat rate and efficiency. The latest development in the thermal power plant design is presented. Techniques to accurately measure the DCS I/O points and the resulting effect on the efficient and reliable plant operation are reviewed. The importance of training the plant operators through real time, dynamic and plant replicated simulators is presented. The seminar concluded with an open brain storming session to discuss thermal power plant related queries and issues.

Description/Conclusion:

The student learning Product development processes, when several noteworthy articles outlined the merits of competing based on a best practices product development process. In 1986, Robert Cooper trademarked the Stage-Gate process, thus sparking the industry wave. Like all bodies of knowledge, time brings evolution and maturation. Some bodies take six decades to fully mature, which is also true for development processes. The surprisingly rapid arrival of the Internet of Things (IoT) and Industrial Internet of Things (IIoT) between 2015 and 2020

necessitates another incarnation of the product development process. And also learn the IoT will be no different than other product development process improvements.

They all had their "what does it all mean?" beginning. Companies that eagerly addressed early-market uncertainties were the first to become proficient. Other companies then copied their practices. These things are easily improve the students IOT related knowledge.

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner. J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Green land. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4 year courses are B.TECH (Information Technology) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electrical and Electronic Engineering strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi-tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to Electrical Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi-disciplinary characters

Course Highlights

- The blockchain technology is redefining the way business function.
- There are several vulnerabilities associated with blockchain technology.
- This text mining literature analysis demonstrates and discusses prominent blockchain vulnerabilities.
- The findings show ever-evolving security threats related to the blockchain technology.
- Highlights future research dimensions for designing secure blockchain applications and platforms.

Insights of the programme

Cybersecurity spending has increased exponentially in the past decade, with no signs of slowing. Worldwide, organizations plan to allocate more than \$1 trillion between 2017 and 2021 to protect themselves from online threats, according to one industry report. Despite that staggering investment, criminal hackers are still exploiting both publicly known and unknown vulnerabilities, and intercepting device, application, and network communications. CB Insights calculated that about 6 billion confidential files were stolen between 2017 and 2018. Other industry research shows that the number and cost of cyberattacks have increased.

Description/Conclusion:

Block chain, the technology infrastructure behind the famous crypto currency bitcoin, can take away the notion of trust from centralized organizations to a decentralized platform that is mathematically verifiable and cryptographically secure. It is gaining more significant momentum exponentially and disrupts the way businesses function beyond the digital currency aspects. This work presents a text mining literature analysis of research articles published in major digital libraries on block chain technology and cyber security. This literature analysis employs automated text mining approaches such as topic modeling and key phrase extraction for unearthing the themes from a vast body of literature. This analysis highlights the multidisciplinary nature of block chain technology within the cyber security domain. The findings also show the cyber threats and vulnerabilities that evolve with block chain technology

Department of

Electronics & Communication Engineering

ABOUT THE COLLEGE

J.K.K. MUNIRAJAH COLLEGE OF TECHNOLOGY, also called as JKKMCT is located at Gobichettipalayam in the Erode district of the state of Tamilnadu. JKKMCT is a private and reputed self-financing institute. The college is approved by AICTE and is affiliated with Anna University, Chennai. The missions of J.K.K. Munirajah College of technology provides to advance knowledge and educate students in science and technology and also teaching, research and innovation and pursue its mission of service to the nation and the world. The college was established in the academic year 2008-2009 and is governed by the Annai J.K.K. Sampoorani Ammal Charitable Trust. Dr. J.K.K. Munirajah founded the charitable trust in 1971 for the purpose of providing health care and Education to the public. JKKMCT is run by this charitable trust. All the academic activities of the college are managed by the Head of the institution, whereas the administrative side is looked after by the trust.

ABOUT THE DEPARTMENT

The J.K.K. Munirajah college of technology has introduced the 4 year course B.E (Electronics & Communication Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Department of Electronics & Communication Engineering works hard to provide in-depth domain knowledge to the students through high quality education.

Faculty Development Program

OUTCOME OF THE PROGRAMME

The participants can gain knowledge in

- Physical intrusion systems
- Mobile security
- RFID security
- Common flaws in current technologies
- Security mechanisms and ways to defeat them

ABOUT THE FACULTY DEVELOPMENT PROGRAMME

The FDP is designed to bring Researchers and faculties from various colleges to a common gathering for exchanging and sharing the recent developments in the field of software defined radio and its allied areas. The experts from prestigious Institutes will deliver expert talks and practical demonstration in the course. More number of participants are expected to participate. Due to limited number of seats as per guidelines of AICTE the registration will be done on the first cum first basis. The T.A/D.A and Boarding & Lodging facility will be provided to outstation participants. The participants are going to gain extensive details of subject knowledge along with practical knowledge. Case studies and practical examples enrich their concept in the field of RF hacking with SDR. This FDP will help them to do better teaching and to conduct research activities at their institutes.

OBJECTIVE OF THE PROGRAM

SDR stands for "Software Defined Radio" and it is used to aggregate radio communication systems that implement in software instead of hardware the omponents in charge of modulating and demodulating radio signals. The goal of this design is to produce a radio that can receive and transmit a new form of radio protocol just by running new software..

PROGRAM HIGHLIGHTS

The Program aims at enhancing the academic and intellectual environment in the Institution by providing faculty members with enough opportunities to pursue research .Participation in seminars/ conferences / workshops would enable faculty members to update their research and pedagogical skills. The training will provide strong feedback and techniques when attacking radio devices in non-perfect environment and ways to succeed your pentests or red team tests.

FACULTY DEVELOPMENT PROGRAMME
on
RF HACKING WITH SOFTWARE DEFINED RADIO

03/01/2022 TO 08/01/2022

SDR is the technology to build these wireless products, analyze the communication, and most importantly break it! Not only does SDR cover all major wireless communication protocols used in IoT i.e. Bluetooth, Zigbee, Wifi, NFC but it offers a vast range of other possible attacks that can be used to compromise the security of a device or infrastructure. This faculty development programme will help the participants to learn its concepts and the techniques used today to receive and transmit signals. All techniques here will demonstrate real uses-cases encountered in pentests and Red Teams, but also techniques that aim to be applied to future systems by teaching important steps when dealing with unknown targets.

OBJECTIVE OF THE PROGRAM:

The main objective was to determine whether those communications were properly secured with encryption and other important security measures. This course provides basics, survival reflexes when testing real-world radio devices, and methods to go further. Comparing to other courses that teach how to use public tools, this class is more about understanding how these tools work and also how to build proper tools to analyze and attack targeted systems. The FDP is organized in such a way faculty get the understanding of RF Hacking architecture in detail.

OF TECHNOLOGY
T.N. PALAYAM (Po)-638 506.

PRINCIPAL
JKK MUNIRAJAH COLLEGE
OF TECHNOLOGY
T.N. PALAYAM (Po)-638 506.

The Programme was inaugurated by the Principal, JKKMCT. The Head of the Department, ECE and convenor of the programme welcomed all the participants. The program coordinator gave an introductory speech about embedded systems. The programme started effectively on the afternoon of the first day Programme. Resource persons were invited from affiliated colleges under Anna University to deliver their valuable lectures. The course is taught in a very intensive mode and each session has a lecture-part and a laboratory-part. The participants were encouraged to attend the program without missing any session.

OUTCOME OF THE PROGRAMME:

The participants were able to have the opportunity to see and exploit vulnerabilities in several RF devices and discover the security features and ways to circumvent them. They can see in practice how to attack physical intrusions systems such as alarms, intercoms and access control systems that use RF technologies such as sub-GHz, cellular, and RFID. The participants will have the opportunity to learn techniques that could be used in Red Team contexts

This FDP Programme was attended by 25 participants including the staff from Departments of ECE and EEE of JKKMCT. Attendees included Research Scholars & Academicians form varied background. While designing the structure of the programme it was kept in mind that there are going to be people from different background that's why emphasis was given on research methodology as a whole not pertaining to one single field so that maximum can be benefited out of it.

More importance was given to technical sessions .The participants eagerly attended all the sessions with more interest.PG participants of JKKMCT also participated in the Programme. Feedback was received from all the participants on the final day of the Programme.

Lastly the Programme ended with a valedictory function on the afternoon session of the final day.The Program Coordinator thanked all the participants for their effective participation and for recording their valuable feedback in the Programme. Certificates were issued to all the participants by the head of the department. The Programme ended with national anthem. This was another very interactive session for the academicians as well as the ones who were pursuing their Ph.D.

J.K.K. MUNIRAJAH

COLLEGE OF TECHNOLOGY

**T. N. PALAYAM (PO), GOBICHETTIPALAYAM
(TK), ERODE (DT), TN-638056**

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, anavid social worker, a person imbibed in deepspiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and a broad in the field of Education. The Institution has an area of 250 acres of land richly endowedwith beautiful Greenland.

The college with its state-of-the-art infrastructural facilities and excellent academic records has earnedrecognition as one of the reputed educational institutions for men & women in India.

About the Department

Civil engineering is the broadest of the engineering fields. Civil engineering focuses on the infrastructure of the world which include Water works, Sewers, Dams, Power Plants, Transmission Towers/Lines, Railroads, Highways, Bridges, Tunnels, Irrigation Canals, River Navigation, Shipping Canals, Traffic Control, Mass Transit, Airport Runways, Terminals, Industrial Plant Buildings, Skyscrapers, etc.Civil engineers build the world's infrastructure. In doing so, they quietly shape the history of nations around the world.Most people cannot imagine life without the many contributions of civil engineers to the public's health, safety and standard of living.

The department of Civil Engineering is committed to impart the knowledge, skills & practical experiences to students such that they are able to formulate and solve the practical problems & serve the society.

Course Highlights

On completion of this FDP, participant will be able to: Understand that the construction management is a professional service that uses specialized project management techniques to oversee the planning, design, & construction of a project. Effective construction management benefits owners by increasing the potential for successful project completion- on time, within budget& free of financial or legal complications. This FDP provides an opportunity for faculty to develop deep knowledge & understanding in different areas of construction management in the domain of teaching & learning process. In this program discuss about a different range of skills & knowledge in the area of construction and engineering such as project management, construction law, supply chainmanagement, &procurement.

Insights of the programme

Introduction to construction engineering and project management, basic information about the construction engineering, brief discussion about the contracts and tender in construction and civil employability. Group discussions about the construction orientation, construction laws, & construction site management and brief about civil engineering project management.

Objectives of the programme

The main objectives of construction management is to manage and control the progress of construction projects. The Construction Manager plans, coordinates, budgets, and supervises the project from start to finish. If one is going to practice management within an industry, it is a good idea to define the arena in which the management techniques will be applied. Alsothe practice of management across all facets of construction project execution. Therefore, construction technology will be introduced only as it, bears on total construction project management. It is a given that you must master the basic technology applicable to your specialized field of construction before you can effectively take on the total management of a construction project. We really need to know just what business we are in to evaluate our present goals, find out where we have been, and where we hope to go from here.

Description/Conclusion:

The Construction Engineering and Management (CEM) Program prepares students to effectively deliver and manage the capital facilities and infrastructure that provides the setting for human and social activity, while also supporting worldwide economic development. The program applies the most advanced engineering and management techniques at the highest level of environmental stewardship. Our curriculum builds upon a student's technical background to develop managerial and financial expertise to be a forward thinker through a mix of fundamental and advanced areas of study. We expose students to the activities and issues of planning, financing, procuring, constructing, technology and innovation as well as managing the built environment in a suite of graduate-level courses. Columbia students apply and discover concepts, methods, and strategies for improving the delivery and management of constructed facilities and systems.

This breadth introduces our students to the variety of managerial functions found in the modern construction industry and prepares them for positions of leadership and responsibility within industry, government, or academia. Taking advantage of our location in New York City, the home of the leading design and construction companies, our students are able to connect with our alumni and leverage industry relationships to advance their careers and magnify their impact on our field.

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4year courses are B.E (Computer Science & Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Computer Science and Engineering strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to software Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi - disciplinary characters

Course Highlights

- Formal Decision framework
- Hybrid Cloud Computing
- Cloud Brokerage
- Cloud-centric design
- Influencing future data centre and operation models

Insights of the programme

Introduction to Data Science using Python.

Python is an open-source (free), general-purpose (unlimited), programming language which is the most popular for doing data science. Many companies and businesses are now using Python to gain insights from their data, which helps them to have competitive advantage. This course will take a practical approach by using codes written in Jupiter notebooks (a tool that most Data Scientists use on a daily basis) to teach you how to program with Python with the focus on doing data science.

Objectives of the programme

The course provides faculties with wide general overview of Python – a general-purpose programming language that is becoming ever more popular for data science. The focus is on the application of Python specifically for data science. The course is about ways to import, store and manipulate data, and helpful data science tools to conducting data analyses. The course is intended for staffs with little programming background. The learning process is facilitated with Data Camp platform.

Cloud computing Research group:

Cloud Computing Research Group in the Department of Computer Science and Engineering of K L University gives opportunities to faculty and students of the group for creating innovative products and e-services that has societal impact. The group celebrates freedom of thought, cultivates vision and encourages growth; it also inculcates human values and concern for the environment and society.

Focused areas of Research:

Cloud Computing; Big Data Technologies; Distributed Systems; Autonomic Computing; Green Computing; All interdisciplinary areas of computing.

Objectives of the Faculty Development program:

To expose the Faculty/ Research Scholars/ Students in emerging technologies in the areas of Big Data Analytics. This course provides practical foundation level training that enables immediate and effective participation in big data and other analytics projects.

The speaker also explains three standard models-Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service in detail. The session continues with a presentation on Google Cloud Platform regions, zones, different management tools and developer tools.

The speaker covers the following topics:

1. Create virtual machine on Google Cloud platform
2. To deploy one small virtual machine
3. Access through other machine and externally
4. Add disk to additional storage
5. Create a Bucket
6. Accessing the Bucket externally

ANNAI J.K.K. SAMPOORANI AMMAL CHARITABLE TRUST run by J.K.K. Munirajah college of Technology was established in the year 2008 Governed by primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner. J.K.K. Munirajah group of Institutions was founded by Dr. J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land mostly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

ABOUT THE DEPARTMENT:

The J.K.K. Munirajah college of Technology has introduced the 4 year courses are B.E (Electrical and Electronics Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai and NAAC Accredited with "A" Grade. The department also offers M.E Program in Power Electronics & Drives with well-organized curriculum and state of the art facilities to meet the emerging man-power requirement in the field of Power Electronics. The Electrical and Electronic Engineering strives towards updating the syllabus, so that the students are always equipped with advanced technology to meet Industrial standards. In-tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to Electrical Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi-disciplinary characters. The department periodically organizes technical talks, workshops, FDPs and national and international conferences.

ABOUT THE TRAINING:

The Students getting training from us are taking as part time smart phone service technician and they are receiving good income from doing it. We are encouraging people to take this valuable course and get the benefit from the certificate that we are providing. In our training phase, we are giving good hands on service training and support to the students. We are provoking our students to analyze the technical issues and to solve it. Hence it would be helpful to improve their technical knowledge and perseverance to make them strong in electronics. The training that we are giving to college students is very reasonable also low in price. The students going out after the training are getting very good compensation and getting valuable knowledge from their career that they are taking after the smart phone service training and getting the certificate from us.

PROGRAM SCHEDULE

THEORY:

- ❖ Basics of Mobile Electronics
- ❖ Smart Phone Trouble shooting Block Diagram
- ❖ Mobile Accessories
- ❖ Innovative applications of Mobile App.

PRACTICAL: (Hands on Training)

- ❖ Finding mobile model
- ❖ Use of various Tools & Instruments used in mobile phone repairing
- ❖ Assembling & Disassembling
- ❖ Testing of various parts with Multimeter
- ❖ Testing of Mic, Speaker, Ringer, Vibrator, LCD, Antenna using Multimeter
- ❖ Finding faults and replacing the faulty parts
- ❖ Soldering & De-soldering
- ❖ Jumpering
- ❖ Touch /Display Replacement
- ❖ Mic, Speaker, Ringer trouble shooting Solutions
- ❖ Insert SIM /No signal solution
- ❖ Mic, Speaker, Ringer trouble shooting Solutions
- ❖ Insert SIM /No signal solution
- ❖ Charging Connector pin Replacement
- ❖ Battery Connector and Head Set pin Replacement

How to Solder and De-solder a component using Blower (CCpin, BCPpin, SIM tray, Memory tray, Head set pin, All mobile IC's etc.....).

SOFTWARE: ((Hands on Training))

- ❖ What Is Flashing?
- ❖ Flashing Tools
- ❖ Flashing Method
- ❖ Pattern Lock
- ❖ Password Lock
- ❖ Hanging
- ❖ Logo Hanging
- ❖ Mic, Speaker, Ringer trouble shooting Solutions
- ❖ Insert SIM /No signal solution
- ❖ Charging Solution
- ❖ Dead Mobile trouble shooting
- ❖ All Hardware Problem
- ❖ SIM tray/Memory tray Replacement

SOFTWARE: ((Hands on Training))

- ❖ Auto ON/OFF
- ❖ Restart
- ❖ SIM lock
- ❖ Unfortunately Google Chrome/Settings/Whats App has Stopped
- ❖ Formatting of Virus affected handsets
- ❖ Flashing of various brands of handsets
- ❖ Unlocking of handset through codes and software.
- ❖ Use of Secret Codes
- ❖ IC Replacement
- ❖ Keypad Problem
- ❖ Touch Screen Problem
- ❖ Network Problem
- ❖ Two types of mobile testing
 - > Continuity test
 - > Voltage test

Description/Conclusion:

We all need to know a little about troubleshooting Android phones. If an engineer/programmer came up with a perfect phone – one that doesn't break apart or malfunctions – who could put a price on that? It simply doesn't exist. We and the phones we make are imperfect—subject to the laws of entropy that dictate a gradual decline into disorder.

When a phone develops problems, the first thing we'd normally do is to troubleshoot it ourselves. And we end up scouring the net for solutions to our phone problems. Troubleshooting Android phones is great because most of the time, you won't spend anything, and you'll be the only one getting access to your device.

PRINCIPAL
J.K.K. MUNIRAJAH COLLEGE
OF TECHNOLOGY
T.N. PALAYAM (Po)-638 506.
ERODE (Dt)

Thankfully, humans are adept at solving problems. There are some common solutions to try in troubleshooting Android phones. This guide will help you discover solutions and implement them as simply as possible.

Resource Person Mr. Karthick, Service Engineer of New Technology, Coimbatore explain the service problems of Cell phone

Try out these fixes for issues with Android apps.

1. Reboot device
2. Update the apps
3. Force stop frozen or leggy apps and restart your phone
4. Sign out & back in to your Google account
5. Try Safe mode
6. Clear app data and/or cache
7. Check app settings

Black screen, blue screen, phone overhcating, battery issues, auto restart/power-off, system crash, bricked Android...? Alright, these may be the most prominent manifestations of Android phone errors, aside from its physical damages.

PRINCIPAL
JKK MUNIRAJAH COLLEGE
OF TECHNOLOGY
T.N. PALAYAM (Po)-638 506.
GOBI (TK), ERODE (Dt).

Actually, when you encounter these problems, you can take Android Repair into account. It is the best Android repair software for PC, which can help solve any system issues almost perfectly for overall Android devices.

Brief intro to Android Repair:

- Fix various Android issues, including phone black screen, play store not working, Android not turning on/off, apps keeping crashing/rebooting, OTA update failed, stuck in a boot loop, Android UI not working, bricked Android phone, and more.
- A high success rate of fixing Android problems.
- Fix Android system to normal easily and quickly.
- Support AT&T, Sprint, Verizon, T-Mobile, Vodafone, Orange, etc.
- Apply to a wide range of Android devices, such as Samsung, Huawei, Motorola, LG, Xiaomi, Sony, OPPO, Vivo, etc.

Resource person Mr. B. Krishna kumar, Managing Director, New Technology hand over the participation certificate.

J.K.K. MUNIRAJAH COLLEGE

OF TECHNOLOGY

T. N. PALAYAM,
GOBICHETTIPALAYAM,
ERODE DT, TN-638056

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, social worker, a person imbibed in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4 year courses are B.E (Computer Science & Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Computer Science and Engineering strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to software Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi - disciplinary characters

Course Highlights

- Data wrangling
- Data exploration
- Data visualization
- Mathematical computing
- Web scraping
- Hypothesis building
- Python programming concepts
- NumPy and SciPy package
- Scikit Learn package for Natural Language Processing

Insights of the programme

Introduction to Data Science using Python. Python is an open-source (free), general-purpose (unlimited), programming language which is the most popular for doing data science. Many companies and businesses are now using Python to gain insights from their data, which helps them to have competitive advantage. This course will take a practical approach by using codes written in Jupiter notebooks (a tool that most Data Scientists use on a daily basis) to teach you how to program with Python with the focus on doing data science..

Objectives of the programme

The course provides faculties with wide general overview of Python - a general-purpose programming language that is becoming ever more popular for data science. The focus is on the application of Python specifically for data science. The course is about ways to import, store and manipulate data, and helpful data science tools to conducting data analyses. The course is intended for staffs with little programming background. The learning process is facilitated with Data Camp platform.

Description/Conclusion:

Python is open source, interpreted, high level language and provides great approach for object-oriented programming. It is one of the best language used by data scientist for various data science projects/application. Python provide great functionality to deal with mathematics, statistics and scientific function. It provides great libraries to deals with data science application.

One of the main reasons why Python is widely used in the scientific and research communities is because of its ease of use and simple syntax which makes it easy to adapt for people who do not have an engineering background. It is also more suited for quick prototyping.

According to engineers coming from academia and industry, deep learning frameworks available with Python APIs, in addition to the scientific packages have made Python incredibly productive and versatile. There has been a lot of evolution in deep learning Python frameworks and it's rapidly upgrading.

PRINCIPAL

JKK MUNIRAJAH COLLEGE
OF TECHNOLOGY

T.N. PALAYAM (Po)-638 506.

G.OBI (TK), ERODE (DT)

In terms of application areas, ML scientists prefer Python as well. When it comes to areas like building fraud detection algorithms and network security, developers leaned towards Java, while for applications like natural language processing (NLP) and sentiment analysis, developers opted for Python, because it provides large collection of libraries that help to solve complex business problem easily, build strong system and data application.

Benefits of Data science using python:

- Ease of Learning
- Faster Development and Processing
- Powerful Packages
- Community Support
- Better Data Visualization
- Compatible with Hadoop

Description/Conclusion:

Spoken Tutorial Forums is a friendly online discussion forum. You can join existing discussions or start new topics, and get lots of replies from the Spoken Tutorial community. Registration to Forums is completely free and takes only one minute. Forums is very easy to use, even for computer newbies. It's very easy to format forum posts with fonts, colors, and many other options. You can attach files to your posts directly from your computer. You can give links to webpages or videos from other video websites.

Spoken Tutorial methodology is used to create a series of OSS tutorials of LateX, Scilab, LiuxPython and more. The duration of a typical tutorial is about 10 minutes and many such tutorial videos can be compiled to form entire study plans capable of advanced teaching as well.

The basic approach is the creation of a script which is the basis for creating the actual video of this

script can be translated into other languages for the audio part, though the visualizations remain in English. It provides tutorials in various Indian regional languages as well.

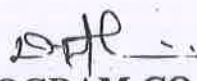

Benefits of remote learning:

- The learning method is highly beneficial for self-learning.
- It helps amateurs achieve expertise in FOSS
- These workshops are conducted remotely via. Video Conferencing Tool, such as Skype.

The J.K.K. Munirajah college of Technology has introduced the UG and PG courses in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Science and Humanities department strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to all Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi – disciplinary characters

Objectives of the programme

Intellectual property is the outcome of human intellect. In other words we can say that intellectual property is an idea of mind that got transformed into physical form which is commercially viable and which improves the quality of life of humans Although, there is an abundance of creative and innovative energies which are flowing in India still, much of the Intellectual Property (IP) created remains unprotected.

The probable reasons could be lack of awareness, weak infrastructural support and perceptual mind blockages related to the complicated procedures associated with the Intellectual Property management Looking into this, nationwide initiatives have been taken by policy makers to spread awareness about the significance of IPRS to promote innovation and Entrepreneurship among students and startups IPR protection provides a tool for entrepreneurs to appropriate their returns from innovation by protecting and commercializing their IPRS. The prime purpose of this FDP is to provide basic knowledge of IPRs, its importance and implications in promoting entrepreneurship and start-up ecosystem among young Scholars, Small & Medium Enterprise (SME) and Grass root level innovators.

- To boost the level of awareness, curiosity, knowledge and information about IPR issues.
- To explain the role of Intellectual Property Rights in promoting and safeguarding the interests of the innovators.
- To analyze the impact of IPR on Technology Transfer agreements, Innovation outcomes and investment on R&D at industry
- To provide an understanding about the provisions and procedures of Indian Patent act and the benefits arising out of the protection and commercialization of Intellectual Property among the start-ups.
- To analyze the impact of IPR on Entrepreneurship Development
