Built environment with Ramp

One of the major objectives of all education programmes that have been implemented at present is to be developing an inclusive education system by providing access to students with disabilities. Our college had provided the ramp facility for the disabled person in our college campus for the easy access of various places in the college by the disabled students. The ramps are carefully designed as per specifications to be used by the differently-abled people.

BUILT ENVIRONMENT WITH LIFT

It has been felt that differently-abled persons need special arrangements in the environment for their mobility and independent function. Choosing the right lift for an educational establishment to ensure the facilities for the disabled in colleges and enabling access for students, is an important decision. Examples of reasonable adjustment in colleges is a step lift (Low -Rise platform lift) to assist simple change in a level where a ramp is impractical or a lift, if the building has two or more floors, that people need to travel between. College building have provision of lift for barrier free access for students, staffs, visitors & differently-abled people.

DISABLED FRIENDLY WASHROOMS

Washrooms are often one of the most important places in a college. We provide people with ability to feel clean &tidyas well as giving them space to relax when they need it. But for disabled people, washrooms that are ill-equipped and don't meet their needs can be a real source of stress. So creating a disabled-friendly washroom is very important in allowing someone to make the most of their washroom. There are two differently abled friendly restrooms for both male and female students. These accessible restrooms carry the fixtures and fittings that are comfortable and convenient to the differently abled people. Nonslip floor, sliding door and grab bars provide easy access to the differently abled people. Sinks and basins have also been modified and crafted to suit the needs of disabled people more.

PEDESTRAIN SIGNAGE INCLUDING LIGHTS, DISPLAY BOARDS AND SIGN POSTS

Sign board ensures visually impaired persons are able to familiarize with the road and path. Tactile sign on handrails at the end of the staircase guide the visually impaired.

Educational institutions need to comply with the safety loss and rules & it is essential for them to place the safety signs as per the defined guidelines.

The signs ensure the safety of the students incase of any emergencies, directional signage , safety signage, branding and vision vision-mission signage are need to be installed throughout the campus. We provide display boards, lights & signboards all the needy places for easy access.
