Principal

J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Anna J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering worldclass quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4 year courses are B.E (Electrical and Electronics Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electronics and Communication Engineering Strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to Electrical Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi – disciplinary characters

COURSE CONTENTS

- Navigation sensor technologies
- GNSS Receivers and Locations
- sensor in Android Devices
- Rf sensors and Their applications
- Frequency selective surfaces in remote sensing and sub-surface scanning application
- Electromagnetic sensors
- Wireless Body Sensor Networks
- Low –power GNSS positioning for IoT solution
- Sensor and internet of Things
- Advances in electric vehicles
- FMCW Radars and its applications
- Use of sensors and IoT technology in automotive in this Digital Era

Address for Communication

NAAC Accreditation Process

- To clarify the doubts of participants regarding the 7 criteria of Revised Accreditation Guidelines (2020)
- To make the participants self-reliant in preparing of Self Study Report efficiently
- To discuss qualitative and quantitative metrics (QIM and QnM) of revised NAAC Accreditation Guidelines (2020)

Name of Chief Guest/Speakers	Dr.A.R.RANGANATHAN, Ohmtronixs, Shanthi Nivas, LIC colony , 3 rd cross street, Pammal, Chennai-600075 Tamilnadu

Description/Conclusion:

Sensor technology is important because it allows for the detection, measurement, and monitoring of physical, chemical, and biological phenomena in various industries such as healthcare, manufacturing, automotive, and aerospace. As sensing technology becomes increasingly pervasive in our IoT-powered world, another variable enters the equation: the 5G network. The expected impact of 5G on our world exceeds the scope of this article, but this high-energy, short-distance network will require many low-powered smart sensors to create the IoT infrastructure envisioned in the smart cities of the future. This will require continuous improvements in smart sensory technology, massively increasing the amount of data processed on edge and in the cloud, and smart sensors will become commonplace.

The major objectives

Sensor technology's objectives include:

- **Improving efficiency, accuracy, and safety:** Sensor technology allows for real-time data collection and analysis, which can improve efficiency, accuracy, and safety in industries such as healthcare, manufacturing , automotive, and aerospace.

- **Developing emerging technologies:** Sensor technology plays a vital role in the development of emerging technologies such as the Internet of Things (IoT) and autonomous systems.
- **Sustainability:** Sustainability is an important goal for sensor development and innovation.

Role of Sensor Technology in IoT

To understand the importance of the role that sensor technology plays in IoT, it helps to step back and look at what IoT and sensors are. Per the National Institute of Standards and Technology (NIST) in their [Special Publication 800-103](#), "Network of Things," IoT can be thought of as, "Systems that involve computation, sensing, communication, and actuation ... IoT involves the connection between humans, nonhuman physical objects, and cyber objects, enabling monitoring, automation, and decision making."

Similarly, NIST [defines a sensor](#) as, "A device, which responds to an input quantity by generating a functionally related output usually in the form of an electrical or optical signal."

ABOUT THE FDP

Faculty Development Program (FDP) on Blockchain Technology is designed to provide educators and academic professionals with a deep understanding of blockchain concepts, applications, and its potential to transform various industries. The program aims to familiarize participants with blockchain fundamentals, such as decentralization, cryptographic security, and consensus mechanisms, while also exploring real-world applications in sectors like finance, healthcare, supply chain, and education. Through hands-on workshops and expert-led sessions, faculty members gain practical experience in developing decentralized applications (dApps), deploying smart contracts, and using blockchain platforms like Ethereum and Hyperledger. Additionally, the FDP covers important aspects such as research opportunities, ethical and legal challenges, and the integration of blockchain with emerging technologies like Artificial Intelligence and the Internet of Things.

The Major Objectives

- Provide participants with a solid foundation in blockchain concepts such as decentralization, distributed ledgers.
- Support faculty in designing and integrating blockchain technology content into existing or new academic courses and programs.

Name of Institution	J.K.K.MUNIRAJAH COLLEGE OF TECHNOLOGY
Name of Event Organized	FACULTY DEVELOPMENT PROGRAM
Title of the Event	Block Chain Technology
Date of Event Organized	25/03/2024 to 30/03/2024
No of Participants	25
Venue	Seminar Hall
Name of Chief Guest/Speakers	1.Mr.R.RAGUNATH Assistant Professor, Department of Information Technology, Nandha Engineering College, Erode, 2.Mr.M.MANOJKUMAR, Chief Executive Officer, AppLogiQ, Ramanuja Nagar, Uppilipalayam, Coimbatore 641015.

Description/Conclusion:

Blockchain technology is a decentralized, distributed ledger system that securely records and verifies transactions across a network of computers, ensuring transparency, security, and immutability. Each transaction is stored in a "block," which is linked to the previous block, forming a chain. The system operates without a central authority, allowing peer-to-peer interactions while utilizing cryptography to secure data and control access. Blockchain's decentralized nature makes it resistant to tampering, fraud, and unauthorized changes. Its applications extend beyond cryptocurrencies like Bitcoin to industries such as supply chain management, healthcare, digital identity verification, and finance, where it enables secure, transparent, and efficient processes. Despite challenges like scalability and energy consumption, blockchain is increasingly recognized for its transformative potential in various sectors, promising enhanced security, reduced costs, and greater trust in digital transactions.

DEPARTMENT OF INFORMATION TECHNOLOGY

EVENT : FACULTY DEVELOPMENT PROGRAM

TOPIC : Block Chain Technology

DATE : 25.03.2024 to 30.03.2024

THE RESOURCE PERSON : Mr.M.MANOJKUMAR,

NO.OF FACULTY BENIFITTED : 25

Principal

**J.K.K.Munirajah College of Technology
(Autonomous)**

**T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506**

The major objectives

- Blockchain aims to streamline processes by automating and simplifying workflows, such as through the use of smart contracts. These self-executing contracts trigger actions when predefined conditions are met, reducing the need for intermediaries and making transactions faster and more efficient.
- Blockchain allows individuals and organizations to have greater control over their data. Through the use of cryptographic keys, users can choose when and with whom to share their information, enhancing privacy and security.
- Blockchain uses cryptographic techniques to secure data, making it nearly impossible to alter past transactions once they are recorded. This objective ensures data integrity, preventing fraud and unauthorized changes, which is especially crucial in industries like finance, healthcare, and supply chains.

Benefits of Block Chain Technologies

- **Creative Content Generation**
 - Art, design, music, and writing creation.
- **Automation of Routine Tasks**
 - Text generation, code creation, and customer support automation.
- **Personalization**
 - Tailored marketing, product recommendations, and user experiences.
- **Enhanced Problem Solving and Innovation**
 - Simulation, modeling, and product development.
- **Cost and Time Efficiency**
 - Faster development, reduced operational costs, and resource savings.
- **Data Synthesis and Augmentation**
 - Generation of synthetic data and improved data augmentation for AI models.
- **Improved Decision-Making**
 - Predictive analytics, scenario modeling, and risk assessment.
- **Enhanced Accessibility**
 - Language translation, transcription, and assistive technologies.

ABOUT THE COLLEGE

J.K.K.Munirajah College of Technology (Autonomous) was established in 2008 and is governed by the Annai J.K.K. Sampoorani Ammal Charitable Trust. Founded by J.K.K.Munirajah a prominent industrialist, technocrat, an distinguished educationalist, and dedicated social worker, and a Philanthropist with deep spiritual values. The institution aims to deliver world class education and training in a structured and systematic manner. The management has proudly completed 25 years of dedicated service to the people of India and abroad in the field of education. Spanning 250 acres of lush green land, the college offers state-of-the-art infrastructure and has earned recognition as one of the esteemed educational institutions for men and women in India. Our institute is accredited with an "A" grade by NAAC and is an ISO-certified Institution.

ABOUT THE DEPARTMENT

The Automobile Engineering Department was started in the year 2010. The department offers four years B. E -Automobile Engineering. The department has a team of highly qualified,

dedicated and motivated faculty and well equipped laboratories with facilities for UG. B.E has been accredited by AICTE, New Delhi. The goal of the Automobile engineering curriculum is to create a flexible undergraduate educational experience in design, mathematics, modeling, computing, management, and engineering science. Principal study topics include fluid mechanics, thermodynamics & heat transfer, solid mechanics, materials engineering, manufacturing, energy systems, dynamics & computer Aided Design (CAD) and others.

ABOUT THE PROGRAMME

This FDP on Electric and Hybrid Vehicles is designed to empower faculty members with the skills and knowledge to teach and research in the dynamic field of electric mobility. The program will not only update them on the technological advancements but also inspire innovative approaches to sustainable vehicle design. Faculty will develop a deep understanding of the design and development of electric and hybrid vehicles. Faculty members will be encouraged to explore EV/HEV-focused research, contributing to innovation in electric mobility.

Description/Conclusion:

Purpose of the FDP: This Faculty Development Program aims to familiarize faculty members with the latest trends and technologies in Electric and Hybrid Vehicles (EVs and HEVs). The goal is to equip participants with the necessary knowledge to enhance their teaching and research capabilities in these cutting-edge fields.

Overview of Electric and Hybrid Vehicles: EVs and HEVs are transforming the automotive industry, providing sustainable solutions to reduce emissions, improve fuel efficiency, and promote clean energy. This FDP focuses on understanding the principles of electric drive systems, battery technology, hybrid propulsion systems, and the integration of renewable energy sources in vehicles.

Objectives of the FDP

- **Knowledge Acquisition:** Participants will gain an in-depth understanding of the principles and technologies used in electric and hybrid vehicles.
- **Hands-On Exposure:** Practical exposure to the design and working of electric and hybrid vehicles, including battery technology, electric drive systems, and energy management.

Principal
J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

- **Research Development:** Encourage faculty to explore potential research topics related to EVs and HEVs, fostering collaboration and innovation in the field.
- **Curriculum Enhancement:** Assist faculty in developing and updating academic curricula to incorporate emerging technologies in electric and hybrid vehicle design.

Session 1: Design and Simulation Tools for EVs/HEVs

- ✓ Introduction to simulation software for EV and HEV design (e.g., MATLAB, Simulink, ADVISOR).
- ✓ Hands-on exercises to simulate and optimize vehicle performance.

Session 2: Battery Management Systems (BMS)

- ✓ Design and implementation of Battery Management Systems for electric vehicles.
- ✓ Challenges in battery life, charging, and safety protocols.

Session 3: Electric Motor Design

- ✓ Principles of electric motors used in EVs and HEVs.
- ✓ Design considerations for high-performance motors.

Session 4: Smart Charging Infrastructure

- ✓ Design and implementation of charging stations for electric vehicles.
- ✓ Fast-charging technologies and wireless charging systems.

5. Expert Sessions

Session 1: Industry Insights on EV and HEV Design

Inviting industry experts to provide insights on the current trends and challenges in the EV/HEV market.

Session 2: Future of Electric Mobility: Research and Development

A discussion on the latest R&D projects and technological innovations shaping the future of electric and hybrid vehicles.

Conclusion

This FDP on Electric and Hybrid Vehicles is designed to empower faculty members with the skills and knowledge to teach and research in the dynamic field of electric mobility. The program will not only update them on the technological advancements but also inspire innovative approaches to sustainable vehicle design.

Erode (Dt) - 638 506

Objectives of the FDP

1. Awareness of Modern Trends

To familiarize participants with emerging technologies and trends shaping the future of civil engineering.

2. Skill Enhancement

To develop skills for integrating advanced tools and techniques like BIM (Building Information Modeling), 3D printing, and IoT into teaching and professional practice.

3. Sustainability Focus

To promote understanding of sustainable construction practices and eco-friendly materials for reducing environmental impact.

4. Exposure to Smart Technologies

To explore smart city concepts, digital twins, and real-time monitoring systems for efficient infrastructure management.

5. Research and Innovation

To encourage participants to engage in cutting-edge research and innovation in civil engineering applications.

6. Industry-Academia Collaboration

To foster partnerships between academia and industry for the application of emerging trends in real-world projects.

7. Professional Development

To update faculty on the latest industry practices and tools, ensuring that students are prepared for modern civil engineering challenges.

8. Global Perspective

To provide insights into global advancements and how they can be adapted to local contexts.

9. Problem-Solving Applications

To demonstrate how new technologies can address practical challenges like urbanization, resource scarcity, and climate change.

10. Enhancing Pedagogy

To improve teaching methods by incorporating advanced trends and practical examples into civil engineering curricula.

Principal
J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

Session 1

Topic: Inauguration and Keynote Address

- Overview of FDP Objectives
- Keynote on Current Trends in Civil Engineering
- Q&A

Topic: Smart Materials and Nanotechnology in Construction

- Introduction to Smart Materials
- Application of Nanotechnology in Cement and Concrete
- Case Studies of Smart Buildings

Day 2: Sustainable Construction & Green Practices

Session 1

Topic: Green Building Materials and Sustainable Design

- Green Concrete and Use of Recycled Materials
- Sustainable Urban Planning
- LEED Certifications and Global Standards

Session 2

Topic: Environmental Impact Assessment (EIA)

- Introduction to EIA and Lifecycle Analysis
- Strategies for Reducing Carbon Footprints
- Real-World Examples and Projects

Day 3: Digital Transformation in Civil Engineering

Session 1

Topic: Building Information Modelling (BIM) and Digital Twins

- Fundamentals of BIM
- Introduction to Digital Twins in Infrastructure
- Hands-on Session with BIM Software

Principal
J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

Session 2

Topic: Drone Technology and Remote Sensing in Civil Projects

- Application of UAVs in Surveying and Monitoring
- Remote Sensing for Land Use and Structural Analysis
- Live Demonstration/Case Study

Day 4: Smart Infrastructure and Advanced Analysis

Session 1

Topic: Smart Cities and IoT Applications

- IoT in Infrastructure Monitoring
- Development of Smart Highways and Bridges
- Implementation Challenges

Session 2

Topic: Advanced Structural Analysis and Earthquake Engineering

- Earthquake-Resistant Design
- Finite Element Analysis (FEA) for Structural Integrity
- Software Demonstration (ETABS/STAAD Pro)

Day 5: Research & Industry Trends

Session 1

Topic: Geopolymer Concrete and Waste Management in Construction

- Geopolymer and Alternative Binders
- Managing Construction and Demolition Waste
- Future Trends

Session 2

Topic: Emerging Research Areas and Closing Ceremony

- Overview of Ongoing Research
- Panel Discussion with Industry Experts
- Feedback & Valedictory Session

Principal
J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

5. Expert Sessions

Session 1: Green Buildings & Resilient Infrastructure

Green Buildings: Energy-efficient design, sustainable materials, and reduced environmental impact. Designing infrastructure to withstand natural disasters and climate change.

Session 2: Future of Smart Infrastructure: Research and Development

A discussion on the latest R&D projects and technological innovations shaping the future of Smart Infrastructure and Advanced Analysis.

Conclusion

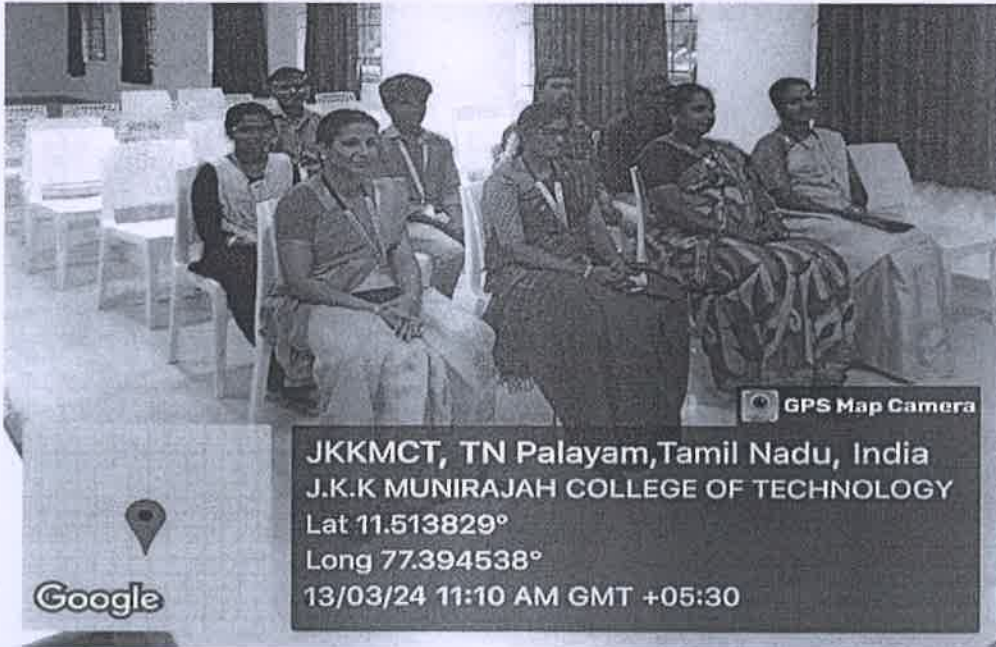

The Faculty Development Program on "Emerging Trends and Applications in Civil Engineering" has provided a comprehensive platform for civil engineering faculty members to enhance their knowledge, skills, and expertise in the latest trends and technologies. As we conclude this Faculty Development Program, we emphasize the importance of continuous learning, innovation, and collaboration in the field of civil engineering. We hope that this program has inspired and motivated participants to become leaders and change-makers in their institutions and communities.

at the National assessment and accreditation council (NAAC)

The term quality assurance usually gets associated with an external accreditation agency identifying the level of quality of an institution, like NAAC in India. National assessment and accreditation council (NAAC), formed under the auspices of UGC has implemented new methodology of accreditation of educational institutions in India. The dimensions of "quality measure" as proposed by NAAC involve continuous process of assessment of HEIs. The outcome of the assessment is the final institutional grading conferred to the institutions. UGC and NAAC have played a vital role in maintaining the quality HEIs. The process has changed the mind set of all stakeholders towards quality and its sustenance and has involved them to strive for its achievement

ABOUT JKKMCT

J.K.K. Munirajah College of Technology (Autonomous) was established in 2008 and is governed by the Annai J.K.K. Sampoorani Ammal Charitable Trust. Founded by J.K.K. Munirajah, a prominent industrialist, technocrat, distinguished educationalist, dedicated social worker, and philanthropist with deep spiritual values, the institution aims to deliver world-class education and training in a structured and systematic manner. The management has proudly completed 25 years of dedicated service to the people of India and abroad in the field of education. Spanning 250 acres of lush green land, the college offers state-of-the-art infrastructure and has earned recognition as one of the esteemed educational institutions for men and women in India. Our institute is accredited with an "A" grade by NAAC and is an ISO-certified institution.

ABOUT THE DEPARTMENT

In our college the departments of Physics, Chemistry, English, Mathematics, and Tamil play a crucial role in shaping the students' foundational knowledge and skills. Here's a brief overview of each department's focus and significance in an engineering context: The department was established in the year 2008 with aim to provide strong fundamentals in Science and Technology under graduate courses and to develop the research activities in Applied Physics and chemistry. The commitment of members of faculty is the real strength of our department in educating the students in Mathematics. Department of English Focuses on developing communication skills, both written and verbal and Emphasizes technical writing, presentation, and soft skills.

FACULTY DEVELOPMENT PROGRAM on

"QUALITY PRACTICES IN NBA ACCREDITATION PROCESS"

Description/Conclusion:

Quality in higher education has become the prime agenda of countries worldwide. In the changing context marked by expansion of higher education and globalization of economic activities, education has become a national concern. The university grants commission (UGC), by virtue of the statutory powers conferred on it is expected to develop effective mechanisms for quality control of institutions. Section 12 of the UGC act of 1956 specifically requires UGC to be responsible for "the determination and maintenance of standards of teaching, examinations and research in universities". Towards fulfilling this mandate, UGC has evolved various monitoring mechanisms for quality control.

The term quality assurance usually gets associated with an external accreditation agency for identifying the level of quality of an institution, like the NAAC in India. National assessment and accreditation council (NAAC), formed under the aegis of UGC has implemented new

methodology of evaluation of educational institutions in India. The new dimensions of “quality measure” as proposed by the NAAC involve continuous process of assessment of HEIs. The outcome of the assessment is the final institutional grading conferred to the institutions. UGC and NAAC have played a vital role in streamlining the quality HEIs. The process has changed the mind set of all stakeholders towards quality and its sustenance and has involved them to contribute for its achievement. They provide adequate guidelines for formulating quality assurance policies as well as for adopting systems and procedures within teacher education institutions for enhancing the quality of the processes involved in teacher development.

NBA assesses and accredits higher education institutions based on their performance in certain parameters.

Promoting quality

NBA aims to make quality the defining element of higher education in India. It does this by promoting quality through self-evaluation, external quality evaluation, and other initiatives.

Encouraging innovation

NBA encourages innovation, self-evaluation, accountability, and autonomy in higher education.

Sharing information

NBA shares information on successful quality strategies.

Collaborating

NBA collaborates with other stakeholders of higher education to promote and sustain quality.

Undertaking research

NBA undertakes quality-related research studies, consultancy, and training programs.

ABOUT THE COLLEGE

J.K.K.Munirajah is a reputed industrialist, technocrat, an educationalist, and excellence in a void social worker, a person imbued in deep spiritual values and a Philanthropist. J.K.K.Munirajah founded a Charitable Trust by name AnnaJ.K.K.SampooraniAmmal Trust, Komarapalaym-638 183, Namakkal Dt., and Tamilnadu in the year of 1971. J.K.K.Munirajah established many temples of leaving to perpetuate the ever lasting memory of his beloved mother. At present AnnaJ.K.K.SampooraniAmmal Charitable Trust maintains and runs Paramedical Institutions offering Diploma, Graduate and Post Graduate courses in Pharmacy, Nursing, Physiotherapy and Occupational Therapy at Komarapalayam, NamakkalDt and a Polytechnic, Community Polytechnic and a Industrial Training Center at T.N.Palayam, Erode Dt. These educational Institutions are temples of Learning and have contributed much to a formidable social change in our society. The Trust has won many National and State awards. They are renowned educational institutions spared nothing to promote knowledge, wisdom and service-orientation.

ABOUT THE DEPARTMENT

The Mechanical Engineering Department was started in the year 2010. The department offers four years B. E. -Mechanical Engineering. The department has a team of highly qualified, dedicated and motivated faculty and well

equipped laboratories with facilities for UG. B.E has been accredited by AICTE, New Delhi. The goal of the Mechanical engineering curriculum is to create a flexible undergraduate educational experience in design, mathematics, modeling, computing, management, and engineering science. Principal study topics include fluid mechanics, thermodynamics & heat transfer, solid mechanics, materials engineering, manufacturing, energy systems, dynamics & computer Aided Design (CAD) and others.

ABOUT THE PROGRAMME

Industrial Automation and Mechanical Design aims to equip participants with the technical expertise and insights necessary to meet the evolving demands of modern industries. With rapid advancements in technology, industrial automation and mechanical design have become crucial in driving efficiency, precision, and innovation in manufacturing, production, and engineering sectors. To provide an understanding of the fundamentals and applications of industrial automation technologies such as PLCs, SCADA, IoT, robotics, and sensors. Industries worldwide are embracing automation to improve productivity, enhance safety, and reduce human error. At the same time, mechanical design serves as the foundation for creating innovative machinery, products.

Name of Institution	JKKM COLLEGE OF TECHNOLOGY
Name of Event Organized	FACULTY DEVELOPMENT PROGRAM
Title of the Event	INDUSTRIAL AUTOMATION AND MECHANICAL DESIGN
Date of Event Organized	19.02.2024 to 24.02.2024
No of Participants	15
Venue	MECHANICAL SMART CLASS
Name of Chief Guest/Speaker	Mr.B.SABINATH,M.E ASSISTANT MANAGER DMW CNC CENTRE, PERUNDHURAI, ERODE.

Description/Conclusion:

The integration of Industrial Automation and Mechanical Design has revolutionized the manufacturing and production industries, enabling higher levels of precision, efficiency, and scalability. Automation minimizes human error, enhances safety, and allows for real-time monitoring and control, while mechanical design ensures that systems are optimized for performance, durability, and cost-effectiveness. For educators, researchers, and professionals, understanding the intersection of Industrial Automation and Mechanical Design is crucial for developing the knowledge and skills needed to meet the challenges of modern industrial

SCOPE OF THE PROGRAM

The Faculty Development Program (FDP) on the **Integration of Green Energy with Smart Grid Power Systems** is designed to equip faculty members with the knowledge and skills required to teach and conduct research on integrating renewable energy sources (solar, wind, hydro, etc.) into modern, efficient, and smart power grids. This program aims to address the growing need for clean, sustainable energy solutions while promoting the development of smart grids that can effectively integrate these renewable resources.

The scope of the FDP encompasses a wide range of topics including renewable energy technologies, smart grid concepts, energy storage, and grid management, as well as practical tools for grid optimization and demand-side management. It aims to help participants understand the technologies, challenges, and opportunities associated with the integration of green energy into modern power systems.

Programme Offered by Department

- B.E -UG in Electrical and Electronics Engineering.
- M.E - PG in Power Electronics and Drives

RESOURCE PERSON

1. **Er. K.KABILAN**
Technical Engineer
M/s KG-Electricals
Coimbatore.
2. **Er. P. Palanisamy,**
Automation Engineer
M/s KG-Electricals
Coimbatore.

COURSE CONTENT

The following are the course contents that will be discussed in the Faculty Development Training Programme.

- Introduction to Green Energy
- Role of Communication and IT in Smart Power Systems
- Power Electronics for Green Energy
- Integration of Renewable Energy Sources with Smart Grids
- Grid-Scale Energy Storage: Challenges and Opportunities
- Demand Response in Smart Grids and Integration with Green Energy
- Microgrids Design, Operation, and Integration with Smart Grids
- Forecasting Techniques for Solar and Wind Energy Generation

ABOUT THE INSTITUTION

J.K.K. MUNIRAJAH COLLEGE OF TECHNOLOGY was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K.Munirajah group of Institutions was founded by J.K.K.Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, social worker, a person imbibed in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of- the- art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

ABOUT THE DEPARTMENT

The J.K.K. Munirajah college of Technology has introduced the 4year courses are B.E (Electrical and Electronics Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electrical and Electronic Engineering strives towards Updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise.

FDP REPORT

Name of Institution	J.K.K.MUNIRAJAH COLLEGE OF TECHNOLOGY
Name of Event Organized	FACULTY DEVELOPMENT PROGRAM
Title of the Event	INTEGRATION OF GREEN ENERGY WITH SMART POWER SYSTEM
Date of Event Organized	12.02.2024 to 17.02.2024
No of Participants	23
Venue	Seminar Hall(A/C)
Name of Chief Guest/Speakers	1. Er. K. Kabilan, Technical Engineer, M/s KG-Electricals, Coimbatore 2. Er. P. Palanisamy, Automation Engineer M/s KG-Electricals, Coimbatore.

Learning Objectives

- Introduction to Green Energy
- Fundamentals of Smart Power Systems
- Technical Challenges in Renewable Energy Integration
- Energy Storage Solutions for Green Energy
- Demand Response and Load Management
- Grid Optimization and Management for Renewable Integration

Description

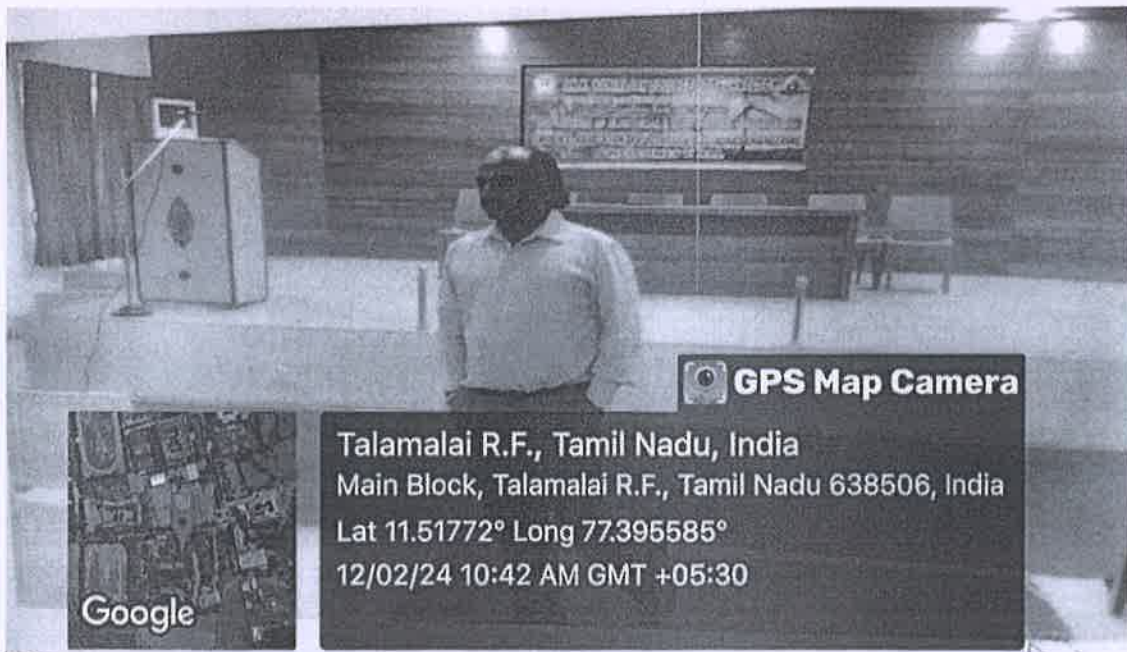

The global shift towards sustainable energy systems is accelerating, and the integration of renewable energy sources such as solar, wind, hydro, and biomass into existing power grids is becoming a priority for enhancing the efficiency and sustainability of electrical power systems. This 6-day Faculty Development Program (FDP) aims to provide a comprehensive understanding of the integration of green energy into smart power systems, focusing on modern tools, techniques, challenges, and opportunities in the sector.

Principal
J.K.K.Munirajah College of Technology
(Autonomous)

Conclusion:

The 6-days Faculty Development Program (FDP) on "Integration of Green Energy with Smart Power System" has been a highly successful initiative in providing participants with the necessary tools and insights to address the challenges and opportunities of integrating renewable energy sources with smart technologies. As the world transitions to more sustainable energy solutions, understanding the intersection of green energy and smart grid systems is becoming increasingly important for professionals in the energy sector.

Over the course of the program, participants were exposed to a rich blend of knowledge and real-world case studies, allowing them to understand both the technical and managerial aspects of smart grids and renewable energy integration. They learned how energy storage systems, advanced grid management, and IoT-based monitoring systems are essential in overcoming the intermittency of renewable energy and ensuring a reliable and efficient power supply.

About the FDP

Faculty Development Program (FDP) on Blockchain Technology is designed to provide educators and academic professionals with a deep understanding of blockchain concepts, applications, and its potential to transform various industries. The program aims to familiarize participants with blockchain fundamentals, such as decentralization, cryptographic security, and consensus mechanisms, while also exploring real-world applications in sectors like finance, healthcare, supply chain, and education. Through hands-on workshops and expert-led sessions, faculty members gain practical experience in developing decentralized applications (dApps), deploying smart contracts, and using blockchain platforms like Ethereum and Hyperledger. Additionally, the FDP covers important aspects such as research opportunities, ethical and legal challenges, and the integration of blockchain with emerging technologies like Artificial Intelligence and the Internet of Things.

The Major Objectives

Generative AI aims to reduce the time and effort involved in producing large amounts of content, such as blog posts, product descriptions, or reports, helping businesses scale their content production. Generative AI can help in areas like architecture

Description/Conclusion:

Generative AI refers to a class of artificial intelligence systems designed to create new content, whether it's text, images, music, or other forms of media, by learning patterns from large datasets. Unlike traditional AI, which focuses on tasks like classification and prediction, generative AI aims to produce novel outputs that resemble the data it was trained on. This technology leverages advanced techniques such as Generative Adversarial Networks (GANs), Variational Autoencoders (VAEs), and transformers to create realistic and original content. Applications of generative AI span various fields, including creative industries (art, music, writing), business (personalized marketing, content automation), healthcare (drug discovery), and entertainment (game design, virtual worlds). It is transforming industries by enhancing

productivity, enabling creativity, and solving complex problems, while also raising ethical questions regarding issues like deepfakes, copyright, and the impact on employment.

The major objectives

- Generative AI is employed in simulation tasks, such as creating virtual environments, 3D models, and animations, which are useful in industries like gaming, training, education, and entertainment
- Generative AI is often designed not to replace human workers but to collaborate with them. The goal is to create systems that assist humans in various tasks—whether generating text for writers or offering design suggestions for artists—enabling more effective and innovative collaboration.
- Generative models themselves can be used to create synthetic data that can improve the training of other AI systems, particularly in areas where labeled data is scarce or difficult to obtain.

Benefits of Generative AI

- **Creative Content Generation**
 - Art, design, music, and writing creation.
- **Automation of Routine Tasks**
 - Text generation, code creation, and customer support automation.
- **Personalization**
 - Tailored marketing, product recommendations, and user experiences.
- **Enhanced Problem Solving and Innovation**
 - Simulation, modeling, and product development.
- **Cost and Time Efficiency**
 - Faster development, reduced operational costs, and resource savings.
- **Data Synthesis and Augmentation**
 - Generation of synthetic data and improved data augmentation for AI models.
- **Improved Decision-Making**
 - Predictive analytics, scenario modeling, and risk assessment.
- **Enhanced Accessibility**
 - Language translation, transcription, and assistive technologies.

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai .K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K.Munirajah college of Technology has introduced the 4year courses are B.E (Computer Science and Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Computer Science Engineering strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industria. standard Hi tech Laboratories also render the necessary expertise

About FDP

The Faculty Development Program (FDP) on R Programming For Budding Data Analysts is designed to equip participants with comprehensive knowledge and practical skills in advanced programming languages, specifically focusing on R programming. This program aims to enhance participants' research capabilities and scholarly contributions by using data analytic techniques into their academic and professional work.

Participants will learn R Programming for Budding Data Analysts focuses on using R, a statistical programming language, to analyze data efficiently. It is ideal for data analysts due to its strong statistical capabilities, data manipulation features, and powerful visualization tools.

The Major Objectives

- Understand R Basics: Learn R syntax, variables, data types, and control structures.
- Data Manipulation: Master techniques to clean, transform, and structure data using packages like dplyr.
- Statistical Analysis: Perform basic statistical operations, including hypothesis testing and regression.
- Data Visualization: Create effective and informative visualizations with ggplot2.
- Reproducible Analysis: Use R Markdown to document and share reproducible reports.
- Problem-Solving Skills: Develop the ability to tackle real-world data analysis challenges using R.

Description/Conclusion:

R programming is an essential tool for aspiring data analysts, offering a powerful, open-source language for statistical computing and data visualization. It provides key features like flexible data structures (vectors, matrices, data frames), efficient data manipulation with libraries like dplyr and tidyr, and robust statistical analysis capabilities, including hypothesis testing and regression. R's visualization packages, especially ggplot2, make it easy to present data insights. Budding analysts can leverage RStudio, an integrated development environment (IDE), and the Tidyverse collection of tools to streamline workflows. With hands-on practice, R allows analysts to clean, analyze, and visualize data, making it a valuable skill for anyone pursuing a career in data science.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

EVENT : FACULTY DEVELOPMENT PROGRAM
TOPIC : R Programming For Budding Data Analysts
DATE : 18.12.2023 to 23.12.2023
THE RESOURCE PERSON : Dr.A. RAMESHKUMAR
NO.OF FACULTY BENIFITTED : 25

Prindpal
J.K.K.Munirajah College of Technology
(Autonomous)
T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506

The major objectives

- ❖ **Mastering Data Structures:** Understanding and utilizing R's core data structures such as vectors, matrices, data frames, and lists for effective data management.
- ❖ **Efficient Data Manipulation:** Learning how to clean, filter, and transform data using packages like dplyr and tidyr.
- ❖ **Statistical Analysis:** Gaining the ability to perform statistical tests, regression analysis, and model building for data insights.
- ❖ **Data Visualization:** Acquiring skills to create informative and visually appealing charts and graphs using tools like ggplot2.
- ❖ **Leveraging RStudio and Tidyverse:** Becoming proficient in using RStudio as an IDE and utilizing the Tidyverse for streamlined, efficient workflows.
- ❖ **Real-World Application:** Developing the ability to apply R to real-world data analysis tasks and effectively communicate findings through data-driven reports and visualizations.

R programming is crucial in data analysis and data science due to its specialized focus on statistical computing and data visualization. Its extensive libraries and packages, such as dplyr for data manipulation and ggplot2 for visualization, make it an invaluable tool for handling complex datasets and generating meaningful insights. R's flexibility allows it to cater to both simple and advanced analysis, making it suitable for a wide range of applications from academic research to industry projects. As an open-source language, R is cost-effective, continuously updated, and supported by a robust community. Its emphasis on reproducibility, along with its adoption across diverse fields like finance, healthcare, and research, solidifies R as a powerful tool for anyone involved in data-driven decision-making and analysis.

About FDP

The Faculty Development Program (FDP) on Generative AI is designed to equip participants with comprehensive knowledge and practical skills in advanced artificial intelligence methodologies, specifically focusing on Generative AI technologies. This program aims to enhance participants' research capabilities and scholarly contributions by integrating Generative AI techniques into their academic and professional work. Participants will learn effective data collection, management, and preprocessing techniques tailored for Generative AI applications. The FDP will also focus on best practices for training, fine-tuning, and evaluating Generative AI models, ensuring robust and reliable performance in diverse research scenarios.

The Major Objectives

- Automation and Scripting: Automating repetitive tasks such as file management, system administration, and batch processing.
- Web Development: Building dynamic, data-driven websites and web applications using frameworks like Django and Flask.
- Data Science and Machine Learning: Analyzing large datasets, building predictive models, and deploying AI solutions with libraries like NumPy, Pandas, TensorFlow, and PyTorch.

Name of Institution	J.K.K.MUNIRAJAH COLLEGE OF TECHNOLOGY
Name of Event Organized	FACULTY DEVELOPMENT PROGRAM
Title of the Event	Python Applications in Real World and NVMe Storage Introduction
Date of Event Organized	13/11/2023 to 18/11/2023
No of Participants	25
Venue	Seminar Hall
Name of Chief Guest/Speakers	1.DR.K. GANESH KUMAR, Department of Information Technology Vellalar College Of Engineering and Technology, Thindal, Erode. 2.DR.A. RAMESHKUMAR, Managing Director, Aalpha Solutions, Chennai.

Description/Conclusion:

Python is a versatile and widely adopted programming language, used across various industries for real-world applications. Its simplicity, readability, and extensive library ecosystem make it ideal for tasks like web development, data science, machine learning, automation, and cybersecurity. Python powers applications ranging from AI-driven tools like voice assistants to financial modeling, scientific research, and game development. Its flexibility allows developers to create robust, scalable, and efficient solutions, making it a key enabler of innovation in technology and business.

NVMe (Non-Volatile Memory Express) is a high-performance storage protocol designed to exploit the full speed potential of solid-state drives (SSDs) by connecting them directly to the CPU via the PCIe interface. Unlike older storage technologies, NVMe drastically reduces latency and boosts data transfer speeds, making it ideal for data-intensive applications in data centers, cloud computing, gaming, and high-performance computing. NVMe provides superior speed, energy efficiency, and scalability, offering a significant advantage over traditional storage solutions. It is becoming a cornerstone in modern data storage infrastructure, meeting the growing demands for faster, more reliable storage systems

J.K.K.Munirajah College of Technology

(Autonomous)

**T.N.Palayam, Gobi (Tk),
Erode (Dt) - 638 506**

The major objectives

- **Simplicity and Readability:** To make programming easier, promoting the development of applications across different industries with minimal effort.
- **Wide Adoption Across Fields:** To provide robust solutions in areas like web development, data science, machine learning, automation, and cybersecurity.
- **Flexibility:** To allow developers to implement Python in diverse domains, including finance, healthcare, gaming, AI, and more.
- **Productivity:** To enable rapid development and prototyping, shortening the time to market for innovative solutions.
- **Improved Speed and Performance:** To significantly reduce latency and increase data transfer rates for demanding applications.
- **High Throughput:** To allow the handling of large datasets and high-performance workloads, especially in data centers, cloud computing, and gaming.
- **Energy Efficiency:** To provide faster storage solutions with lower power consumption compared to traditional storage systems.
- **Scalability and Parallelism:** To support high levels of concurrency, allowing multiple commands and queues for efficient data processing.
- **Next-Gen Storage Solutions:** To offer cutting-edge storage technology, ensuring a smooth transition to future applications and workloads that demand higher speeds and lower latency.

Python plays a crucial role in the real world due to its versatility, ease of use, and wide application across various industries. Its simple syntax makes it accessible to developers of all skill levels, and its extensive libraries and frameworks enable rapid development of solutions in fields like data science, artificial intelligence, web development, automation, and cybersecurity. Python is integral to creating scalable and efficient applications, driving innovation in sectors ranging from finance to healthcare and beyond. Similarly, NVMe (Non-Volatile Memory Express) storage is vital in modern computing due to its ability to deliver significantly faster data transfer speeds, lower latency, and greater scalability compared to older storage technologies. This makes it indispensable for applications that require high performance, such as data centers, cloud services, real-time analytics, and gaming. NVMe's energy efficiency and support for parallel processing make it an ideal choice for handling large volumes of data in high-demand environments, ensuring that storage solutions can meet the growing needs of next-generation technologies. Both Python and NVMe are foundational in driving technological advancements and improving efficiency across diverse fields.

About the College

J.K.K. Munirajah college of Technology was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering worldclass quality in Education and Training in a structured and systematic manner J.K.K. Munirajah group of Institutions was founded by J.K.K. Munirajah, who is a reputed industrialist,technocrat, an educationalist par excellence, an avid social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of- the- art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

About the Department

The J.K.K. Munirajah college of Technology has introduced the 4year courses are B.E (Electronics and Communication Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electronics and Communication Engineering Strives towards updating the syllabus. So that the students are always equipped with advanced technology to meet Industrial standard Hi tech Laboratories also render the necessary expertise. To develop the department as a center of excellence to take care of the local and regional needs related to Electrical Engineering activity, and to encourage students and faculty to undertake research Programme & Projects of multi – disciplinary characters

About the National assessment and accreditation council (NAAC)

The term quality assurance usually gets associated with an external accreditation agency for identifying the level of quality of an institution, like the NAAC in India. National assessment and accreditation council (NAAC), formed under the aegis of UGC has implemented new methodology of evaluation of educational institutions in India. The new dimensions of "quality measure" as proposed by the NAAC involve continuous process of assessment of HEIs. The outcome of the assessment is the final institutional grading conferred to the institutions. UGC and NAAC have played a vital role in streamlining the quality HEIs. The process has changed the mind set of all stakeholders towards quality and its sustenance and has involved them to contribute for its achievement. They provide adequate guidelines for formulating quality assurance policies as well as for adopting systems and

Address for Communication

NAAC Accreditation Process

- To clarify the doubts of participants regarding the 7criteria of Revised Accreditation Guidelines (2020)
- To make the participants self-reliant in preparing of Self Study Report efficiently
- To discuss qualitative and quantitative metrics (QIM and QnM) of revised NAAC Accreditation Guidelines (2020)

Description/Conclusion:

The Internet of Things (IoT) is a network of physical objects that can connect and share data with other devices and systems over the internet. The goal of IoT is to create devices that can communicate with each other and users in real time

➤ The major objectives

Devices	IoT devices, also known as "smart objects", can include household objects, wearables, industrial machinery, and transportation systems.
Purpose	IoT enables devices to communicate with each other and perform tasks autonomously.
Benefits	IoT can help businesses automate processes, reduce labor costs, and improve service delivery.
Applications	IoT can be used for many purposes, including monitoring environmental conditions, managing traffic, controlling machines, and tracking inventory.

Examples

IoT can help businesses improve operational efficiency, reduce costs, and enhance customer satisfaction. Some ways to measure operational efficiency include:

- Tracking the reduction in time and resources needed to complete tasks
- Gauging enhanced customer satisfaction through customer feedback, increased retention rates, and improved service levels

IoT can also help ensure high data accuracy, system uptime, and the speed of issue resolution.

Day 6	Effective classroom management

SCOPE OF FDP

Faculty Development Programme (FDP) on innovative teaching and learning pedagogy may include sessions on case studies, role playing, and integrating technology. The program may also include industry visits and sessions with industry experts. The primary objectives of the FDP on Teaching Methodology were as follows:

- Update faculty members on modern teaching techniques and methodologies.
- Enhance their understanding of learner-centered teaching.
- Promote the integration of technology in the teaching-learning process.

ABOUT JKKMCT

J.K.K. Munirajah College of Technology (Autonomous) was established in 2008 and is governed by the Annai J.K.K. Sampoorani Ammal Charitable Trust. Founded by J.K.K. Munirajah, a prominent industrialist, technocrat, distinguished educationalist, dedicated social worker, and philanthropist with deep spiritual values, the institution aims to deliver world-class education and training in a structured and systematic manner. The management has proudly completed 25 years of dedicated service to the people of India and abroad in the field of education. Spanning 250 acres of lush green land, the college offers state-of-the-art infrastructure and has earned recognition as one of the esteemed educational institutions for men and women in India. Our institute is accredited with an "A" grade by NAAC and is an ISO-certified institution.

ABOUT THE DEPARTMENT

In our college the departments of Physics, Chemistry, English, Mathematics, and Tamil play a crucial role in shaping the students' foundational knowledge and skills. Here's a brief overview of each department's focus and significance in an engineering context: The department was established in the year 2008 with aim to provide strong fundamentals in Science and Technology under graduate courses and to develop the research activities in Applied Physics and chemistry. The commitment of members of faculty is the real strength of our department in educating the students in Mathematics. Department of English Focuses on developing communication skills, both written and verbal and Emphasizes technical writing, presentation, and soft skills.

Description/Conclusion:

Pedagogical Emotional Competence empowers educators to navigate the emotional landscape of teaching-learning process. This mastery involves fostering positivity, empathetic communication, and employing emotionally intelligent teaching strategies. Educators with high pedagogical emotional competence can forge profound connections with students, elevating teaching effectiveness and fostering engaging educational experiences. Besides, honing research-paper skills, peer-review acumen, and interdisciplinary collaboration further covers a comprehensive academic prowess.

Faculty Development Programme (FDP) on innovative teaching and learning pedagogy may include sessions on case studies, role playing, and integrating technology. The program may also include industry visits and sessions with industry experts.

Effective class room management

The sixth day was dedicated to classroom management techniques. Educators learned strategies for maintaining a positive learning environment, handling disruptions, and fostering student engagement. Case studies and role-playing exercises on learning to learn were used to illustrate effective practices.

ABOUT THE COLLEGE

J.K.K. MUNIRAJAH COLLEGE OF TECHNOLOGY was established in the year 2008 Governed by Annai J.K.K. Sampoorani Ammal Charitable Trust, primarily with the objective of delivering world class quality in Education and Training in a structured and systematic manner J.K.K.Munirajah group of Institutions was founded by J.K.K.Munirajah, who is a reputed industrialist, technocrat, an educationalist par excellence, social worker, a person imbued in deep spiritual values and a philanthropist. The management has completed 25 years of dedicated service to the people of India and abroad in the field of Education. The Institution has an area of 250 acres of land richly endowed with beautiful Greenland. The college with its state-of-the-art infrastructural facilities and excellent academic records has earned recognition as one of the reputed educational institutions for men and women in India.

ABOUT THE DEPARTMENT

The J.K.K. Munirajah college of Technology has introduced the 4 years courses are B.E (Electrical and Electronics Engineering) in the year of 2008. The course was approved by AICTE, New Delhi and affiliated by ANNA University at Chennai. The Electrical and Electronic Engineering strives towards updating the syllabus. So that the students are

always equipped with advanced technology to meet Industrial standard Hi-tech Laboratories also render the necessary expertise.

ABOUT THE PROGRAMME

The Faculty Development Program (FDP) on Energy Harvesting Techniques for Wireless Sensor Networks (WSNs) was designed to provide an in-depth understanding of the energy challenges faced by modern sensor networks and to explore innovative solutions to address these challenges through various energy harvesting techniques. The primary objective of this program was to equip participants (faculty members, researchers, and engineers) with the knowledge and practical skills required to design energy-efficient wireless sensor networks by leveraging alternative energy sources like solar, thermoelectric, piezoelectric, and RF energy.

WSNs are widely used for applications such as environmental monitoring, smart cities, agriculture, healthcare, and industrial automation. However, the energy constraints of sensor nodes often deployed in remote or hard-to-reach locations make energy harvesting a critical area of research and development. This FDP focused on enabling participants to explore the latest techniques, technologies, and practical approaches for harvesting energy in a sustainable manner.

Benefits of the Energy Harvesting Techniques for Wireless Sensor Networks

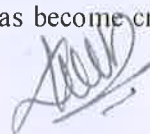

- In-Depth Knowledge of Energy Harvesting Techniques
- Hands-on Experience with Real-World Systems
- Enhanced Ability to Develop Sustainable WSNs
- Knowledge of Power Management Techniques
- Exposure to Emerging Trends and Technologies
- Promotion of Interdisciplinary Collaboration
- Contribution to Sustainable Development
- Empowerment for Research and Teaching
- Increased Awareness of Future Challenges

Description:

The Faculty Development Programme (FDP) on Energy Harvesting Techniques for Wireless Sensor Networks (WSNs) was organized with the aim of enhancing the knowledge and practical skills of faculty members, researchers, and professionals in the domain of energy-efficient sensor networks. As Wireless Sensor Networks (WSNs) become increasingly important in applications such as environmental monitoring, healthcare, industrial automation, and smart cities, the challenge of powering these networks efficiently and sustainably has become critical. This FDP

Principal

J.K.K. Munirajah College of Technology
(Autonomous)

focused on energy harvesting technologies that can power sensor nodes autonomously, reducing reliance on traditional battery power sources, and thereby improving the overall efficiency and lifespan of WSNs.

Conclusion:

The Energy Harvesting Techniques for Wireless Sensor Networks (WSNs) FDP was a resounding success, achieving its primary objective of providing participants with a comprehensive understanding of energy harvesting techniques and their practical applications in sensor networks. The program was designed to meet the growing need for sustainable and energy-efficient systems in the field of WSNs, particularly as these networks are increasingly deployed in remote or off-grid locations where traditional power sources are unavailable.

By combining various energy harvesting methods—solar, thermoelectric, piezoelectric, and RF—the program equipped participants with the knowledge to design hybrid systems that can meet the energy demands of modern sensor networks.

ABOUT THE COLLEGE

J.K.K.Munirajah is a reputed industrialist, technocrat, an educationalist, and excellence in a void social worker, a person imbued in deep spiritual values and a Philanthropist. J.K.K.Munirajah founded a Charitable Trust by name Annai.J.K.K.Sampoorani Ammal Trust, Komarapalayam-638 183, Namakkal Dt., Tamilnadu in the year of 1971. J.K.K.Munirajah established many temples of leaving to perpetuate the ever lasting memory of his beloved mother. At present Annai.J.K.K.Sampoorani Ammal Charitable Trust maintains and runs Paramedical Institutions offering Diploma, Graduate and Post Graduate courses in Pharmacy, Nursing, Physiotherapy and Occupational Therapy at Komarapalayam, Namakkal (Dt) and a Polytechnic, Community Polytechnic and a Industrial Training Center at T.N.Palayam, Erode Dt. These educational Institutions are temples of Learning and have contributed much to a formidable social change in our society. The Trust has won many National and State awards. They are renowned educational institutions spared nothing to promote knowledge, wisdom and service-orientation.

ABOUT THE DEPARTMENT

The Mechanical Engineering Department was started in the year 2010. The department offers four years B. E -Mechanical Engineering. The department has a team of highly qualified, dedicated and motivated faculty and well

equipped laboratories with facilities for UG. B.E has been accredited by AICTE, New Delhi. The goal of the Mechanical engineering curriculum is to create a flexible undergraduate educational experience in design, mathematics, modeling, computing, management, and engineering science. Principal study topics include fluid mechanics, thermodynamics & heat transfer, solid mechanics, materials engineering, manufacturing, energy systems, dynamics & computer Aided Design (CAD) and others.

ABOUT THE PROGRAMME

The Faculty Development Program (FDP) on "Recent Trends in Mechanical Engineering" was successfully conducted with the objective of acquainting participants with cutting-edge advancements and innovations in the field. The program brought together faculty members, industry experts, and researchers to discuss technological progress and its implications for academia and industry. The Faculty Development Program on Recent Trends in Mechanical Engineering was a successful initiative that helped faculty members stay up-to-date with the latest advancements in the field. The program enhanced their technical and pedagogical skills, enabling them to contribute effectively to both academic and industry advancements. Going forward, it is recommended that similar FDPs be organized periodically to keep educators abreast of new developments.

Description/Conclusion:

Mechanical engineering is at the forefront of technological transformation, addressing critical challenges in efficiency, sustainability, and innovation. By adopting emerging technologies like AI, IoT, and additive manufacturing, the field is redefining traditional processes and creating smarter, more adaptable systems. Sustainability is no longer optional but a necessity, driving engineers to design solutions that balance performance with environmental responsibility. These trends are not only shaping the future of mechanical engineering but also creating a significant impact on industries, society, and the global economy.
