INTRODUCTION ABOUT DIFFERENTLY-ABLED PERSON FACILITIES

J.K.K.Munirajah College of Technology provides barrier-free environment where people with disabilities can move about safely and freely and use the facilities within the built environment. This designed environment enables individuals to function autonomously, facilitating their full participation in daily activities across the campus.

Buildings, facilities, and transportation systems are constructed with universal design principles, ensuring they are fully accessible and free of barriers.

We ensured the safety of the ramp with non-slippery surfaces on flooring, tactile paths & lifts for the convenient travel throughout the campus inspite of the program the building holds such as classroom, lab & cafeteria.

BUILT ENVIRONMENT WITH RAMP

A key objective of our educational programs is to foster an inclusive education system by ensuring access for students with disabilities. In line with this, our college has implemented barrier-free infrastructure by providing ramp facilities throughout the campus.

These ramps are designed to allow easy access to various campus locations for students with disabilities, adhering to specific standards to ensure safe and convenient use by individuals with mobility challenges.

BUILT ENVIRONMENT WITH LIFT

It is recognized that individuals with disabilities require specialized accommodations within the built environment to facilitate mobility and independent functioning. Selecting an appropriate vertical transportation system to ensure accessibility for people with disabilities, enables seamless vertical access. Examples of reasonable adjustments in academic settings include the installation of step lifts (Low-Rise Platform Lifts) to address minor level changes where long continuous ramps are impractical. It ensures equitable access for educators, learners, visitors, and individuals. These provisions are designed in compliance with accessibility standards to ensure full inclusivity.

DISABLED FRIENDLY WASHROOMS

Washrooms play a vital role in any educational institution, providing individuals with a space to maintain personal hygiene and relaxation. For people with disabilities, creating accessible, user-friendly washrooms ensures that all users can navigate these spaces with ease and dignity. At our institution, we have implemented fully accessible washrooms, for both male and female. These restrooms are equipped with specially designed fixtures and fittings to ensure comfort and convenience. Features such as non-slip flooring, strategically placed grab bars facilitate safe and independent use. Additionally, sinks and basins have been utilized to accommodate & experiencing both functional and accessible.

PEDESTRAIN SIGNAGE INCLUDING LIGHTS, DISPLAY BOARDS AND SIGN POSTS

Signage plays a crucial role in ensuring barrier free environment that can navigate the campus safely and independently. Tactile signs on handrails at the ends of staircases, for instance, guide visually impaired users, helping them familiarize themselves with their surroundings and the path ahead.

We adhered to safety regulations and guidelines, making the installation of appropriate safety signage essential. This sign ensures the well-being of students, particularly during emergencies, by providing clear directional and safety instructions.

In addition to emergency-related signage, directional signs, space signs, amenities, safety symbols, and campus branding—including vision and mission statements strategically placed across the campus. We have made provisions for the installation of display boards, illuminated signage, and other necessary signposts with eco-friendly materials.
